Financial Times Wednesday December 10 1986

Oils quiet

decline to 2551/2p in Norcros

Suggestions of an overseas group building up a stake aroused fresh demand for Caffyns which lifted the shares 20 further to 238p. The

the shares 20 further to 2385. The better-known Component mann-facturers were overshadowed for the second consecutive session by Supra. Still influenced by the agreed share exchange terms, or partial cash alternative announced by Kmada on Morday Supra ad-

by Evode on Monday, Supra ad-vanced further to 91p, for a fresh rise of 5, while the bidder gained 3

to 123p. Sporadic US support raised Jaguar 5 to 528p. Associated Newspaper's 2.8 per cent shareholding in Herald and Weekly Times, which has recently

responded strongly to a bid from Rupert Murdoch's News Corpora-

tion, stimulated revived buying of

the shares ahead of the UK group's

preliminary statement, due on January & The price of Associated

eventually moved up 15 to a 1986

eventually moved up 15 to a 1986 bigh of 371p. Recently-firm Chap-man Industries remained at 225p following good interim figures, while Irisb support lifted Jefferson Smurfit 15 to 325p. Norten Opax regained the previous session's fall, closing 4 up at 125p but McCor-quedale eased 5 further to 225p. Sastchi and Sastchi encountered both domestic and US interest and

both domestic and US interest and

advanced 17 further to 720p. Abaco investments touched 71p

ior to closing a net 2½ up at 69

following the agreed acquisition of estate agents Hampton & Sons for £15m end the deal whereby

Standard Chartered will sub-scribe for some 25.4m new Abaco

shares at 74p per sbare at e cost of £18.8m, part of which will be used

to finance the cash element of the

Britisb Gas continued to domin-

ate trading in the energy sector and the oil majors did little more than mark time pending the start of

the forthcoming Opec meeting; huyers preferred to stay on the idealized following contacts that the

sidelines following reports that the Opec talks face deadlock as Saudi

Arabia continues to press for an immediate return to a fixed price of \$18 a harrel, while maintaining

or \$16 a narret, while maintaining eurrent output quotas. Tricentrol's third-quarter results matched recent gloomy predictions and the price eased 2 to 58%p.

price eased 2 to 30% p. Business in South African min-ing markets remained at an extremely low ebb. Builion's reluctance to break out of the cur-

capacity by some 15 per cent. Rivals Impala hardened a shade to

790p. Activity in Australian mines remained at n low level as " down-under " interest continued to cenwere again favoured and several, including Ambrose Investment, at 430p, and Tor Investment, at 465p, made useful gains.

Demand for Traded Options held up remarkably well to Monday's record levels. Total contracts transacted yesterday amounted to 75.334-the second highest since the market's inception. In contrast the market's inception in contrast to Monday's business, however, activity centred on call positions which attracted 50.852 trades, as opposed to 24.482 puts. Not surpringly, British Gas accounted for the lion's share of the session's turnor with 25.524 cells, and turnover with 35,534 calls and 14,931 puts struck. Dealers also reported enthusiasm for calls in British Telecom, Humon Trust and Dixons. The FT-SE 100 index contributed 301 calls and 1,060 puts.

### WALL STREET **Prices drift** downwards in dull trading

LACKING any fresh news to give them direction, Wall Street stock and bond market drifted in light trading yester-day, writes Roderick Oram in New York. The Dow Jones industrial average lost 13.36 points to close at 1,916.90 although it was only a few points down on the day until late in the session. The Dow Jones Transportation index was also hit, falling 12.21 points to 841.48.

The New York Stock Exchange com-posite index slipped 1.02 points to 142.57 on volume of 128.7m shares with declining issues outpacing rising hy a margin of two-to-one. It was the second quietest session in a month with institutional huyers largely absent.

The market's downward trend since setting a record last Tuesday is beginning to make some analysts question whether the Dow can break forcefully through the 2,000 level by the end of the year.

Among hlue chips yesterday, Allied-Signal was off \$% to \$42%, Anheuser Busch slipped \$% to \$27, Citicorp fell\$1% to \$53, General Electric lost \$11/4 to \$86%, IBM dropped \$% to \$127%, Mobil was unchanged at \$38% and Sears Roebuck lost \$% to \$42%.

Deere fell \$% to \$23% after reporting a \$139.7m loss for the fourth quarter from operations reflecting the severely depressed farm equipment market.

United Technologies rose \$% to \$45%. 1t announced a \$592m restructuring writeoff in the fourth quarter which would result in a "substantial loss" for the period American Motors was unchanged at \$3% after forecasting "a modest loss" for 1987.

Panhandle Eastern, a natural gas pipeline operator, eased down 5% to \$27%. It is planning to make a \$50m-\$55m charge in the fourth quarter.

In sharp contrast, Firestone Tire and Rubber reported fourth quarter earnings of 64 cents a share against 5 cents, It share price slipped \$% to \$27%.

Goodyear Tire and Rubber, down \$% to \$42%, said it had arranged \$4hn credit line which will help its recapitalisation prompted by the aborted takeover offer from an investor group led by Sir James Goldsmith.

On the takeover front, General Cinema, up 5% to \$45%, raised its stake in Carter Hawley Hale to 49.1 per cent from the equivalent of 38.6 per cent. The stores group has put a 50.1 per cent cap on General Cinema's holding.

Carter Hawley gained \$1 to \$48% on heavy volume of more than 4.3m shares. The Limited and Mr Edward DeBartolo dropped their takeover offer on Monday after Carter Hawley said it was splitting its stores operations into two publicly traded companies to the financial benefit of existing shareholders. BankAmerica advanced \$% to \$15 following news that First Interstate Bancorp., unchanged at \$54%, bad applied to regulatory authorities to pursue its hostile \$22 a share hid for the troubled West coast bank group. Joy Manufacturing slipped \$% to \$31%. It filed suit trying to block the takeover offer bid by Pullman-Peabody which gained \$% to \$7%. Lockheed, the aerospace group subjec ted recently to intense speculation that it was about to be taken over, adopted a shareholders' rights plan to frustrate any raid. Its shares fell \$1% to \$51%. British Gas was actively traded on its second day with 4.27m American Depository Receipts each representing 10 partly-paid shares changing hands. The price slipped \$% to \$8%. Trading in the credit markets was light and featureless in the absence of any economic news. Despite marginally positive factors such as lower gold and oil prices, a firmer dollar and a Fed funds rate below 6 per cent prices of government securities slipped. The price of the 7.50 per cent benchmark Treasury long bond eased down 1/2 of a point to 1021/2 at which it yielded 7.33 per cent. Three-month Treasury bills slipped one hasis point to 5.48 per cent while six-month and year bills were unchanged at 5.48 per cent and 5.50 per cent respectively.

#### DUBLIN STOCK MARKET

### Foreign flavour features in record run abroad - such as star USM performer FII (Fruit Importers of Ireland) - has

THE RECENT surge in the Irish equi-ties market, which has sealed a year of impressive performance, was sustained yesterday by strong trading which saw a two-week trend of daily record highs continue, writes Hugh Carnegy in Dublin.

There has also been heavy activity in recent days in Irish gilts, which account for more than 90 per cent of turnover in the Dublin market, bringing long-term yields down from over 13 per cent to 12.5

per cent. Broker J. & E. Davy's Equities index stood at 584.17 at lunchtime, up 4.75 on Monday. It has gained 50 per cent this year.

Prominent yesterday again was Jef-ferson Smurfit, the Irish packaging and paper maker, the hulk of whose business is now in the US. It was up 16 Irish pence to 340 Irish pence.

#### Dublin, which is a regional unit of the London Stock Exchange, has been the strength of a handful of leading companies which, like Smurfit, have achieved big profit growth overseas and no longer depend on the weak local economy. Currency movements have mainly favoured

them this year. These include Waterford Glass, which when its takeover of Wedgwood, the English bone china group, is complete will account for nearly 15 per cent of the total Irish market capitalisation; Cement-Roadstone and Allied Irish Banks. Together with the Bank of Ireland, these companies make up more than 60 per cent of the present total market capitalisation of I£3.5bn (\$4.7bn), based on 48 companies excluding USM and oil companies.

Brokers say the overseas performance and prospects of these and other companies increasingly looking to expand

#### AUSTRALIA

SENTIMENT WAS boosted in Sydney by speculation of another takeover bid for BHP and the market reached its

Resources said it would underwrite the placement of Equiticorp Tasman's 5 per cent stake in BHP. This was interpreted as signalling another bid attempt on BHP soon. Bell Resources held steady at A\$4.15. Equiticorp Tasman rose 5 cents to A\$1.60. Bell Resources parent, Bell

News Corps proposed takeover of the Herald and Weekly Times was oversha-dowed by the BHP development and trading in media issues thinned. News Corp eased 10 cents to A\$17.70. HWT dropped 5 cents to A\$12.75.

domestic investors. More than 12300m has been raised on the Irish market this year, they say. Another factor behind the trend has been the outstripping of supply by de-

prompted a reappraisal of equities by

mand. Exchange controls limiting Irish huying of foreign stocks fuels local de-mand but the punitive Irish tax regime curbs the shifting of shares.

In the gilts market, which has grown sharply in recent years on the back of the Government's need to fund burgeoning public deficits, there has been a resurgence in demand after difficulties earlier this year when a liquidity squeeze, prompted hy sterling's weakness and worries about the state's ability to meet its borrowing requirements, pushed up interest rates.

### French give push to peak in Brussels

FOREIGN INSTITUTIONAL support boosted Brussels to its second consecutive peak although volume slipped back from Monday's level.

Domestic buyers, encouraged by the new tax investment scheme, continued to be heavy huyers while foreign, notably French institutions, entered the market. The Belgian Stock Exchange index rose 16.39 to 4,131.69.

Utilities, some holding groups and chemicals were in the spotlight again, with market beliwether Petrofina firming BFr 50 to BFr 9.920.

GBL continued to lose ground in the wake of US investigations into affiliate Drexel Burnham Lambert. GBL lost BFr 50 to BFr 3.660.

Among stronger, chemical stocks Sol-vay jumped BFr 70 to BFr 8,990 and UCB closed BFr 230 higher at BFr 9,300. Utility Ebes put on BFr 80 to BFr 5,050 while Tractebel finished BFr 50 stronger

at BFr 6,550. The rate of interest on three-month Treasury certificates edged 5 basis points higher to 7.40 per cent.

Milan encountered heavy selling pressure after a market holiday on Monday. Heavy foreign selling pushed prices down across the board with many issues losing further ground in after bourse trading.

Insurers and industrials suffered the Generali lost L3.900 to L123.600 while Ras dropped L2,520 to L52,500. Toro at L29,000 was L1,600 down. Fiat dropped L445 to L13,250 and Montedison dropped L110 to L2,860 on plans to increase its stake in insurer Fondíaria to 40.5 per cent.

A feature of the strong performance in TOKYO Utilities run out

of steam UTILITIES and some blue chips opened higher in Tokyo, hut buying interest

waned rapidly in the afternoon, steeply pushing down share prices across the board, writes Shigeo Nishiwaki of Jiji Press.

Tokyo Gas failed to reach a record high as expected, and instead came under heavy selling pressure, which dampened the market.

The Nikkei stock average fell 107.96 to close at 16,602.72 on a volume totalling 844m shares, up from Monday's 709m. Trading amounted to 560m shares in the morning alone. Losses led gains 506 to 315, with 165 issues unchanged.

Many low-priced large-capital issues were active. Kawasaki Steel, the busiest with 67.41m shares changing hands, re-mained unchanged at Y206, while Nippon Kokan, which was placed second with 75.55m edged up Y1 to Y267. Trading in Tokyo Gas shares came to 65.54m. shares, third heaviest for the day.

Investors had been awaiting a new high by Tokyo Gas. But after rising Y40 in the morning to match the record of Y1,230 set on October 1; the issue was hit by heavy selling and closed Y20 lower at Y1,170. The unexpectedly large selling dampened investor sentiment and heralded a downturn in prices.

Tokyo Electric Power rose Y60 to a re-cord Y6,530, at one stage. But caution spread because the issue had been rising without pause since hitting a low of Y5,800 on October 25, and the stock finished Y130 lower at Y8,340. Instead, investors increased buying of other power stocks priced lower than the market leader. Kansai Electric Power added Y30 to Y4,100 and Chubu Electric Power Y100 to Y4,200.

Matsushita Electric Industrial opened Y30 higher, but was sold later as the market mood deteriorated to finish at Y2,090, off Y10. Fujitsu fell Y20 to Y1,220.

Large-capital chemicals turned down, with Sumitomo Chemical losing Y15 to Y412 and Showa Denko Y5 to Y387.

Mirroring the firm US bond prices, dealers actively bought government bonds. The yield on the 5.1 per cent gov-ernment bond tumbled from Monday's 5.290 per cent to 5.250 per cent in the morning. But the rumours of a tight money policy apparently had a big im-pact on dealers, sharply boosting selling. The yield shot up to 5.295 per cent, but later traded at 5.275 per cent.

#### CANADA

A FURTHER broad retreat was seen in active Toronto trading as most major share groups weakened in line with Wall Street. The downward trend was helped by industrials. Bell Canada fell CS% to trade at C\$37, Canadian Pacific slipped CS% to C\$17 and Campeau lost CS% to C\$24.

Precious metals turned lower and metals and mines joined the retreat. Montreal was also lower.

sidelines in Singapore where the market closed lower after a session marked by very quiet trading. The Straits Times in-dustrial index fell 7.45 to 883.95.

Falls were seen across a broad front with a number of blue chip issues registering the heaviest losses. Malaysian issues were particularly weak.

DBS dropped 15 cents to S\$8.95 while Genting slipped 10 cents to S\$6.05. Inchcape was 6 cents cheaper at S\$2.81.

#### Hong Kong

SELECTIVE DEMAND from overseas institutions and local investors took Hong Kong higher and the Hang Seng index gained 9.06 to 2,440.35.

China Gas, a favourite after its announcement that its customers will be paying 9 per cent more next year, rose 40 cents to HK\$19.40. Hk Land put on 5 cents to HK\$6.35 while Sun Hung Kai Properties rose 20 cents to HK\$18.50.

Swire Pacific A advanced 20 cents to HK\$19.

#### SOUTH AFRICA

GOLD SHARES were easier in moderate Johannesburg trading, while indus-trials were mixed with an easier hias. Vaal Reefs fell R2.50 to R355.50 while Harties dropped 50 cents to R49.75. In mining financials Gencor eased R1 to R54.50

Platinums were mixed. Impala gained 50 cents to R49.75 while Rustenberg dropped R1.25 to R45.00.

Frankfurt turned mixed in pre-Christmas lethargy.

The Commerzbank index at 2,063.6 posted a modest 4.6 gain.

Deutsche Bank stood out among weaker banks with its DM 2 rise to DM 831 while AEG among electricals was bought DM 1.40 to DM 335.40. Siemens eased 50 pfg to DM 754.50.

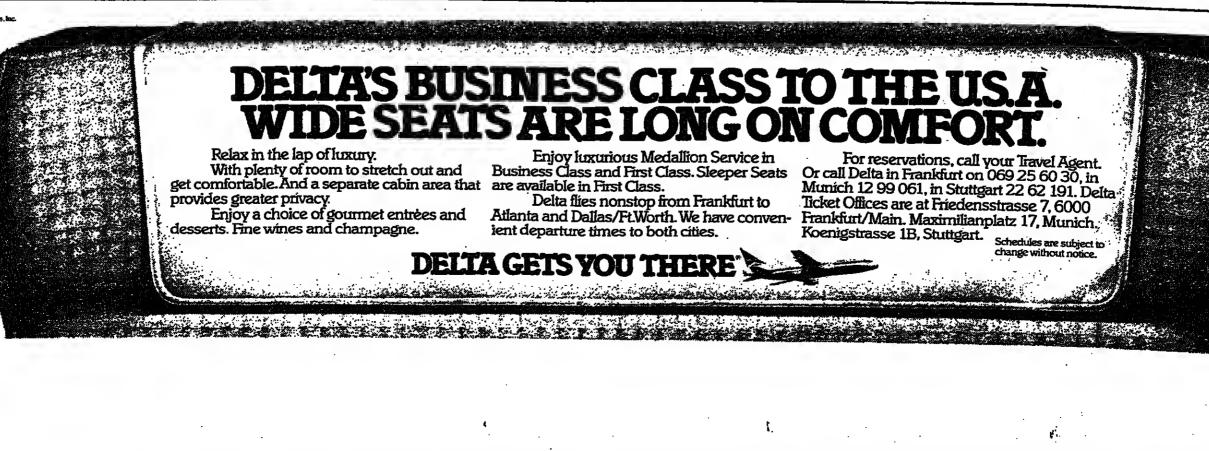

Daimler proved the weakest among the car makers with its DM 6 drop to DM 1,258 while BMW, which announced extra shift working to produce its new model, slipped DM 1 to DM 598.

Stockholm remained inhibited by interest rate concerns and closed slightly higher.

Paris regained its composure after the climbdown by the Government on its proposed university legislation. Foods performed well due to the stronger dollar. Moët Hennessy firmed FFr 109 to FFr 2,589 while Perrier picked up FFr 29 to FFr 612.

Zurich closed higher with some profittaking in blue chips offset by buoyant demand.

Amsterdam suffered mixed trading in thin volume while Madrid dropped sharply as constructions lost ground. Oslo also sustained a sharp drop in moderate volume.

### PRIVATE BANKING RE-DEFINED

A t American Express Bank we believe that A yesterday's concept of "private banking" no longer meets the needs of today's complex world. And so our approach to private banking is as different, as innovative, as our bank itself - in a number of ways.

For example, we are one of the very few banks that specialize in serving international clients, and we have over 65 years of experience in this field. Today, with 85 offices in 39 countries - one of the world's largest banking networks-we are present in all the key financial centers of Europe, Asia and Latin America. In Switzerland,

private banking services are provided by American Express Bank (Switzerland) AG. And, through American Express Bank International, we now serve international clients in the major U.S. gateway cities of New York, Miami and Los Angeles.

#### **Investment opportunities**

Moreover, we offer an exceptionally broad spectrum of services. For example, we not only assure full-time, professional portfolio management, we also give you access to the special investment opportunities available through the worldwide American Express family of companies, Result: an unequaled choice of ways to protect your assets and make them grow.

#### **Exclusive services**

In addition, we also provide a number of services of particular value to international clients. These include Gold Card® privileges through American Express Bank and our exclusive, roundthe-clock Premier Services,5M for the business and personal travel needs of certain clients.

To help you benefit from this broad array of services, we assign one of our Account Officers as your personal advisor. An experienced professional, he coordinates American Express Bank's global resources on your behalf, supported by one of today's most advanced telecommunications and computer networks.

Private banking re-defined, by American Express Bank : personal, innovative, fine-tuned to the special needs of international clients. For more information on how this unique concept can help you reach your financial goals, contact us today. In Zurich, telephone 01/211 55 20; in Geneva, 022/32 65 80.

American Express Bank Ltd. is a wholly-owned subsidiary of American Express Company, which has assets of more than US\$92 billion and shareholders' equity in excess of US\$5.7 billion.

Exceptional service in private banking.

### Into another bumper year

Unlos Bank

of Switzerla

20.9.86 30.9.85

64.88

EARLY THIS year the Swiss commercial banks were doubt ful whether they would be able to keep np their remarkable to seep np their remarkable profits growth. Despite extremely conservative account-ing practice, net earnings had doubled between 1979 and 1985, rising from year to year not only in their overall total but also on a per-employee basis. After last year's jump of some 18 per cent, the banks felt they if there is such a ceiling, it will certainly not be reached Due from banks 47.10 41.09 Clients' deposits in 1986. Although Swiss banks do not publish interim profit-Due to banks ss accounts, many of them have already said earnings will have already said earnings will again be higher. The use of key phrases like "gratify-ing results," "considerable increases" and "substantial growth" indicates that the rise will be of much more than just a few per cent. The current second half will probably not see quita the same upswing relative to the same period in 1985 as the January-June period. Each of the big three—Union Bank of Switzer-Swiss Bank Corporation and Crédit Suisse-has recently drawn attention to a deceleration in the third guarter, due to combination of narrower rest margins, a weak dollar and rather less expensive securities business, A notice-able rise in annual profits seems, nevertheless, certain. The big banks are not alone

in expecting another bumper year. The Association of Foreign Banks in Switzerland reckons on "favourable reckons on "favourable results again" and a spokes-man for the cantonal banks reports the same general trend. The nature of their core activities in the financial-serprivate banks continue to fourish; the same certainly goes for such ex-private banks as Julius Baer and Vontobel this, banks continue to build up bad-debt provisions. In 1985 the Big Three alone booked " losses, as Julius Baer and Vontobel. As far as actual balance-sheet totals are concerned, growth has been only slight this year so far. The Swiss National Bank reports a rise of only some 1.8 per cent over the first eight months. This reflects to a large extent, bow-ever, the simultaneous fall of the dollar in Swiss-franc terms by almost eractly 20 per cent It also indicates that Swiss bankers are not particularly sheets these days, anyway. This depreciation and provisions" totalling more than SFr 1.Sibn, a rise of 22.5 per cent on the previous year, the vast majority of this being accounted for by precentionary What this means is illustrated by the case of Credit Suisse, which in the period 1980-85 put some SFT 2.1bn on the side for these purposes as com-pared with its entire share capital of SFr 1.6bn; the aim, says the management, has been to "shield the bank and its sheets these days, anyway. This is less a matter of the country's shareholders as far as possibla stringent capital-ratio regulastringent capital-ratio regula-tions--at the end of last year from the risks of today's world." Swiss banks' capital resources The watchdog Swiss Banking amounted to SFr 57.6bn, or Commission, which has 122 per cent of the overall hastened this trend by demand-statutory requirement--than a ing 20 per cent value adjust-question of the generally more lucrative nature of commission-based business. This does not mean anything approaching an exodus of Swiss by no means limited to foreign bankers from the laterest sec-

While interest income is run-ming at about normal and acceptable levels, banks have experienced a marked rise in their non-interest activities. An important factor bere has been the boom on the capital market. As universal banks, Swiss institutes act not only as investors but also as issuing houses and stockbrokers.

This means they have benefited from the record volume of new issues on that public capital market, with a newmoney total of over SFr 31.2bn in the first three-quar-ters of 1986 alone, and from the high level of listed prices. (The Swiss Bank Corporation share index reached an all-time high at the start of this year and is not far off this peak

options around the corner, quite apart from the massive volume attained this year in conven tional share and bond trading. a lot of money is having to ge into new facilities. Fortunately, record gross-carnings totals mean that investments here and on the retail side of electronic banking can be made without too much pain. Also, stock-broking banks benefit from such cooperative ventures as their Telekurs data service. Indeed problems will probably be more on the personnel side

than in technology as such, At the same time, the Swiss banks are going to have to keep expanding abroad. As important as such fee-based business as fiduciary accounts, portfolio management, currency and metal trading and securities operations are and will remain in Switzerland, banks realise the imperative need to consolidate their already strong positions in foreign financial centres. This means particularly growth in post-Big Bang London, in New York and to an increasing extent in Tokyo and

### The oldest Stock Exchange in Switzerland is also the newest

(Founded in 1850)

Geneva's unique financial history dates back to the 15th century when foreign traders and bankers settled here. Since then it has never ceased to enlarge its international outlook - a fact which is well demonstrated by the large concentration of multinational companies and organisations that have made Geneva their European headquarters.

also boasts a brand new Stock Exchange building, updated with the finest computer and communications technologies. The new Stock Exchange enhances Geneva's competitive edge in the world of finance and secures its position as a major international center. The Geneva Stock Exchange, besides listing Swiss securities, also deals in those of most European and overseas countries.

Known as "the City of Banks" Geneva now

Swiss Banking 3

A suggestion that the obliga-tion to identify the "beneficial Manila was tardy; big Swiss bank got wind that some Marcos owners" of funds should be Act bas been dropped. The Bankers' Association is trying to put together a body of suffi-lient deterrent anthority from its own ranks to restore credibility to the concention.

An associate cause on which the National Bank has been campaigning and which also exposes a weakness in the convention concerns the role of lawyers and fiduciery agents. Under their own commitment to professional secrecy the lawyers can handle clients' funds and clace them with the banks without disclosing the clients' oames. They have to declare that they know their clients personally and give assurances that the transactions they are initiating do not abuse bank Secrecy.

This practice provides an un-satisfactory shield for the reputation of Swiss banking, the National Bank feels. However, consistent with the arguever, consistent with the argi-ment that it is not a supervisory body which it used to explain its withdrawal from the conven-tion, the Bank bas left this particular problem to the Bank-ing Commission to sort out. If the bankers assert truly that the core bank secrecy and its splue to foreign invectors its value to foreign investore remain unshaken, substantial mutations are also visible under the influence of new foreign laws, the globalisation of banking and eveo the new financial instruments. The shape of Swiss bank secrecy is being re-

#### Profile/Claude de Saussure

### In the bankers' chair

MONEY MAY be their liveli-hood but very few bankers walk around with pictures of their ancestors on the banknotes in their pocketbooks. The Swiss Iranc 20 note carries the portrait of Horace-Bénédict de Saussure, depicting on the reverse side the scientific expedition which climbed Mont Blanc in 1768 under his command.

Horace-Bénédict's descendant, Claude de Saussure, has just taken over as chairman of the Swiss Bankers' Association. At the age of 66 he is retiring this year as senior partner of Pictet et Cie, one of the two hig Genevan private banks.

Retiring is perhaps the wrong word, for according to Genevan bankers who know him well, he is likely to be a very ective chairman and he is keeping an office at Pictet. His intellectual capacity and openness to new ideas are widely regarded as baving contributed decisivaly to Picter's eminence and successful adaptatioo to e radically changed banking scene.

Claude de Saussure trained as e lawyer, married the daugh-ter of a private banker, was introduced initially to Pictet by friends made during his milltary service and was sent to New York to train with J. P. Morgan and Lehman Bros in the early 1950s. His son, Jecques, born in New York in Mr de Saussure approves strongly of this system: "It keeps the association close to the banking community and 1952 will become a partner in Pictet at the end of this year. means that it does not reflect only what our staff in Basle may think and write." There is no real problem It is a tradition that the Bankers' Association is chaired by a private banker: Mr de over the convention de dili-gence, Mr de Saussure claims, aussure succeeds Mr Alfred Sarasin from the private bank of the same neme in Basle. The association represents the full spectrum of Swiss banking from are no differences of substance the dominating big three with their strong international insorting out "a question of legal approach." terests to the cantonal and small local banks and the With e Bill on its way through parliament the prob-

finance companies. "It means you need someone neotral in the chair: it would not do to have somebody from a big bank or a local bank," Mr de Saussure explains.

Something more than a lobbyde diligence, the agreement that sets the ethical standards

ompany in Switzerland and the leck of reciprocity has irked Swiss bankers.

★Ⅲ

The possibility that authority over the banks is shifting from the National Bank to the Federal Banking Commission does oot worry Mr de Saussure. On the contrary, he would be happy to see the Commission acquire the status of an uncontested authority. "1 edmire the Bank of

England: when it pronounces, people keep quiet and follow suit. The best way is to bave a regulator thet you can respect because you know that it will reach reasonable decisions. I would like the Commission to bave such standing." But, Mr de Saussure also

makes it cleer be would expect the Commission's authority to be exercised in the particular Swiss way. When the Commission issues a circular, or directive, it is frequently "kind enough" to submit a draft in advance to the Bankers' Asso

Some circulars bave been "very mucb improved" in the

very much improved " in the process. "We would like to keep the system of consultation before ection," Mr de Saussure says. ### Private Banks

### Fast growth in personal service

Year

IN THE great mass of Swiss banking the private banks stand out as a small paradoxical elite. For some bankers they are anachronistic both in their are anachronistic both in their image—brass name plates at the entrances to venerable houses in historic city wards— and in their corporate form 25 associations of partners, fre-quently members of one family, eccepting unlimited responsi-bility for the bank's liabilities. Yet some private banks are

Yet some private banks are earning sufficient profits and expanding their husiness fast enough to sustain their prestige amply. The paradox is that, as their number dwindles, the type of business in which the Swiss private banks specialise -gestion de fortune or the management of weakh-is one of the fastest growing sectors in world banking, on which many big banks are concentrat-ing their resources.

many big banks are concentrat-ing their resources. Arthur Andersen, the man-agement consultants, caught this paradox in the survey they published in September cover-ing more than 100 financial specialists' views on the cut-look for Switzerland as a finan-cial centre over the next 10 years.

years. Most respondents placed private banking among the sectors where a contraction in numbers would take place. But they also agreed unanimously that banks specialising in asset management would achieve the best results over the next 10 years and forestw an annual growth potential of more than 10 per cent in this field for both the big banks and the private banks.

banks. The point, of course, is that as the scope for their speciality increases, so does the competi-tion. Big US banks have seen that the Geneva guivate bankers' style of doing busi-ness with friends rather than with customers is more acceptwith classifiers is more accept-able to wealthy clients. Making them feel special by arranging their holidays, find-ing schools for their children,

advising them on art purchases, is no longer the monopoly of the private banks. In return, the bettes ergen-ised private banks are bidding. in competition with the big banks for the business of mapaging the immense, accumulat-ing assets of institutions such as US and Swiss pension funds, and offering corporate financial

advice Here performance against the institutional managers' chosen statistical yardsticks is chosen statistical variations is the key to success rather than personal attentions but the larger private banks, Pictot and Lombard, Odiar in Geneva, have successfully adjusted to the new techniques required.

Pictet and the new chairman of the Swiss Bankers' Associa-tion. Private banks have always operated at the international level practicely in the fee-generating of balance-sheet area which is expanding under the securitisation of banking business, he points out: they should therefore have a reserve of expanience on which to draw

of experience on which to draw in facing up to competition.

the nominal capital. In Zurich, the big private banks, Julius Baer and Von-tobel, have formed themselves into limited companies, keep-ing control within the family. Vontobel raised some SFr 225m in July from an issue of bearer shares which left the family holding 85 per cent of the voting rights and the bank's employees 8 per cent. Further attrition is to be expected in the ranks and no new banks are likely to be founded at a sparinerships with unlimited responsibility Mr de Saussure admits. But he points out the opportunities open to the remaining private banks cap-able of adapting have been demonstrated by banks of employees 8 per cent. Sarasin, the Basic private bank, has found a different solution. Last month it an-nounced that it was transformdifferent structure operating in the same field, such as the Oom-pagnie de Banque et d'Investiss-ments (CBI) founded in Geneva in 1969 by Edgar. de

Swiss Banking 5

### **Proliferation worries the Swiss**

FOR YEARS past the Swiss have adopted a liberal policy towards edmitting foreign finan-cial institutions, so that now foreign-owned concerns account for about one-third of financial companies in Switzerland. The mere numbers—there are about 200 foreign institutions—

are no true measure of the foreigners' impact on the country, however. In their banking activities and portfolio manage-ment the foreigners have grown up side-by-side with the Swiss without trespassing their traditional preserves.

But the proliferation of foreign institutions active in the

foreign historichon market, does worry the Swiss. Finance houses, which are exempt from Swiss banking regulations and are active in the capital market, have been the main growth area in the foreign banking community.

The beginning of the to the beginning of the to the beginning of the to the total to the total to the total total to the total The most recent statistics pro-duced by the Association of Foreign Banks in Switzerland Ty and an in 1973, bit oundation back to the h Some have been performed recent years with a reater vitality and an umber suggests. > country than that body is in the established players The US commercial banks

Switzerland. The position of the Japanese securities houses has been one of the main subjects of the debate about reciprocity. These houses are increasingly repre-sented in Switzerland where active in the foreign hond market have more recently been joined by their investment joined by their investment banking counterparts. They, too, could carve out a signifi-cant niche in the foreign bond new issues husiness, though so far they have kept a fairly low profile. Jepanese corporates have long been the mainstay of the private placement market. profile.

But the Swiss representation in Japan is much smaller and the split in Japan between the functions of banks and securi-ties houses means that Swiss universal banks cannot enjoy the same freedom there as at banks. The Swiss banks have main-tained their rôle in lead-managing issues for the major borrowers in the market. But there have been instances of the US banks obtaining man-

This led the Federal Banking Commission in March to call e temporary halt to the licensing

ness to buy a market share.

This is one of the problems that has led the Swiss to re-examine the reciprocal require-ments they should demand for allowing outsiders into their reciprocity where a Swiss insti-tution is no more restricted in foreign institution's own tended to channel mandates to Soditic by-passes the "club deal" system and, Eurobond market-style, puts together ed hoc teams to underwrite particular deals.

The Swiss set much store or reserving their market for high quality borrowers and are afraid that the foreign hanks will take it "down market." But they have made their own mistakes, such as when Dome Petroleum, Crédit Suisse'e client, this year had to ask Swiss franc bond-holders for e temporary repayment waiver. Foreigners complain that the

Swiss operate a policy of effec-tive exclusion by making it difficult for them to obtain trained staff, for work permits are hard to get.

This scarcity of talent is felt acutely in the foreign bond market, where it is tending to put up salaries. Especially since the arrival of the US in-vestment houses, it has caused staff moves between the foreign banks, a development contrary to the Swiss tradition of investors' loyalty. Time will tell how far the

Swiss Banking 6

### Capital Markets

### The Big Three square up to stiffer competition

future level of the index.

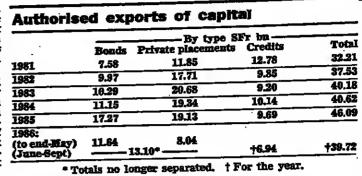

THE SWISS franc foreign bond market plays a key role in international capital raising, but has never succumbed to tha extreme competitive pressures that have hit the Eurobond market.

market. Competition is limited because Swiss regulations allow only banks domiciled in Switzerland to issue foreign bonds, so the "Big Three"— Crédit Suisse, Union Bank of Switzerland, and Swiss Bank Corporation—with their exten-sive retail customer network still tower over the market. These banks have established substantial fixed commission structures and comparatively leisurely issuing practices involving negotiated pricing between underwriters and long subscription periods for bonds. Co-management positions are accordingly still a profitable business in the foreign bond market, encouraging a large inflow of new, non-Swiss players in recent years. limited Competition is

was no exception to a series of record runs.

total at the same stage last year by SFr Son. All but SFr 6.94hn of the amount was accounted for by foreign bonds and notes. With 10-year borrowing costs

With 10-year borrowing costs as low as 5 per cent on "straight" issues for prime quality borrowers, the trend towards a concentration of issues at the shorter maturities was reversed during the first half of the year. In the year to May 31, public bond issues, with maturities of eight years and more, totalled SFr 11.64bn, SFr 3.6bn more than the total for notes issues. In May the Swiss National Bank in a surprise move abolished the distinction

pressure on banks to tighten disclosure on longer-dated deals. The National Bank had long The retail cheft base of the foreign bond market tends to limit the scope for diversifying issuing structures away from "straight" fixed rate bonds, but the market has been experiment-ing with a number of new struc-The National Bank had hold been concerned that the lack of prospectus requirements for notes was a weak link in in-investor protection measures, since secondary market trading tures this year. had grown up in these supposed

The banks were against the (Foreign Interest Payment Secu-rities) enjoyed a vogue. These were a variation on the dual-currency bond, a familiar instruchange since they feared that the increased costs and delays associated with public bondtype documentation would frighten borrowers away from

Traditionally, when issuing a note they had made information circulars available for view at exchange rate. The "FIPS" were introduced by Credit Suisse, which issued a successful bond for PepsiCo in their offices and often these cir-

Soon the issnes were trading at around 95, a discount to par issue price rarely seen in the Swiss franc sector. Another innovation this year;

Another innovation this year, originally invented in the year market, was the "bull and bear" issue. These two-tranche bonds were designed to give the investor a five-year flutter on the Swiss Bank Corporation share index, as the redemption amount varied according to the

The borrower's exposure, meanwhile, was cancelled out by the two opposing sides of tha transaction. But bankers said that, with most investors still optimistic about the pros-nects for the Swise conity pects for the Swiss equity market, it was hard to find takers of the "bear" tranches. Swiss bankers say their retail Swiss bankers say their retail clients have little appetite for innovations, preferring the familiar, "plain vanilla" fixed-rate bond. At the same time, however,-they acknowledge that competition in the international securities business means that they will be increasingly forced to diversify their product ranges.

The "Big Three" banks are having to face up to competition from new competitors in their own market. They fear that the influx of foreigners will disrupt the orderly market practices established through their influential syndicate, though as yet their control has remained broadly intact.

The "Big Three" have been unable to prevent the US houses from quoting grey market prices in new issues, however. The big Swiss banks discouraged this practice because they said it opened up the prospect of price manipulation, while the US banks argued that it increased investors' awareness of the true value of bonds.

But only Chemical Bank has gone so far as to quote screen grey market prices. This year there have been signs of increasing disagree-ments between the "Big Three." Crédit Suisse and Union Bank of Suitzaland for instruction of Switzerland, for instance, disagreed with Swiss Bank Cor-poration's pricing of its recent convertible issue for Bell

Resources. But the big banks dismiss any suggestion that this is a sign of the hierarchy cracking. They say that the fact that they feel able to voice their differences is really a sign of solidarity and strength in an increasingly com-petitive environment. The Swiss franc foreign bond market remains, at least in their

market remains, at least in their eyes, very much a club affair.

the insurance centre Zurich-has not reached this level withhas not reached this level will-out a reason. First of all, the Swiss themselves are extremely insurance-conscious; in 1984 they spent the equivalent of nearly \$880 per head on premiums, a figure second only to that of the United States. The country's traditional country's traditional

The orientation towards inter-national financial services has national infancial services has further made it the home of several leading insurance multi-nationals. Of the 1984 premium total, some 53 per cent came from foreign husiness. Swiss insurers and re-insurers

are also very profitable. All leading companies showed higher net profits in 1985 and are expecting another good year in 1986, A Union Bank of Switzerland study published last month already forecasts a rise in earnings growth of "a good 10 per cent" for next year, always assuming a more favour-able development of exchange

As in previous years, however, this ostensibly gratifying state of affairs covers a serious weakness. This is the parlous condition of operating results in the non-life sector. Both direct and re-insurance groups have long had to hear heavy technical losses here, even if these have been hitherto more than offset by rising and substantial capital income

Group

In 1985, Zurich Insurance, Swiss Reinsurance, Winterthur and Baloise Insurance alone booked a joint underwriting loss of some SFr 1.5bn.

released 1984 totals showing annual premiums of well over SFr 31.8bn. Switzerland—and particularly the insurance centre Zurich— risen further in 1985, both also

reckon with better operational results for this year. An important factor in this trend is tha more selective approach to new business. Insurers feel they no longer have to accept unsatisfactory conditions with virtually inhnilt losses and have been rationalis ing their portfolios accordingly. Earlier this year, the industry's own information unit, the Berne-based Versi-cherungs-Information, bad for cast a deceleration in premium growth for 1986. This seems likely to come true, largely because of the weakening of so many currencies against the Swiss franc bnt also as a result

of more conservative acquisi-tion policies. ton policies. The biggest fly in the oint-ment of the multinational operators has long heen the American market—more specireduce cost ratios in 1985-some, belped by the foreign-

the US last year accounted for about one-half of Zurich's overall operational deficit of NY: 592.2m, while American liability claims made up no less than two-thirds of Swiss Re's non-life underwriting loss. Companies have been at pains booked premium growth of over 15 per cent for the year, guite apart from the overall rise in investment income. Not only

to draw the consequences from what Dr Dichl has called "lia-hility hysteria" in the US. At are underwriting profits the rule and capital income subthe same time, American insurers have themselves been tackling the problems, while numerous states are reviewing claim procedures. In the words of Dr Heinz Portmann, management chairman at Zurich, improvements on the US market will this year have a "notice-able effect" on results.

Another operational measure which is now bearing fruit in Swiss Insurance is the mini-mising of costs. As Winterthur's managing director Dr Peter Spälti points out: "Not least from the aspect of competitive ability, we place great value on the lowest possible cost ratios in thet both in Switzerland and on various foreign markets limits are set to our premiums." Most companies were able to

exchange situation, even saw an absolute decline in Swissfranc costs. Life assurance busines

stantial and growing, but domes-tic activities were also boosted by the new pension-fund legis-lation. This first led to a marked npswing in collective policies and then, towards the end of the year, to the inception of so-called "third-pillar" pro-grammes providing for indi-vidual provident policies bene-

fiting from a government tax break. There have been some rather less positive develop-ments in the life sector, too, however, The banks — which are themselves often less than are intensives often less than happy about insurers' presence on the morigage market—are competing in tha field of "third-pillar" programmes; this sometimes works in co-opera-tion with life insurance com-

panies, as with the new portfolio - management - plus assurance - policy scheme of Royal Trust Bank (Switzer-

land), but mora usually not. "Tha wind is blowing harder in the life-insurance husiness as numerous banks have set up as real competitors in the provident sector," says Swiss Life's management chair-man Dr Walter Diener, "Life insurers will bave to offer their clients additional services." Increase

In the international sector, the US again seems to have played a negative role. In 1985, for example, the underwriting profit from life insurance and re-insurance within the Swiss Re group plummeted from SwFr 78m to SwFr 27m, its lowest level in at least ten

particularly successful last year. on the US market, together Blg Five among the life with a coincidental rise in insurers—Swiss Life and Pen- claims, Given the importance of sion, Winterthur Life, Vita, this otherwise reliable contri-Baloise Life and Patria—all butor to operational earnings, has announced the group has announced "immediate, energetic mea-Sures." Good news for the life assurance sector came at the start

of this month, when Minister of Justice Elisabeth Kopp announced the long-awaited liberalisation of investment regulations. This means that in future life companies will be able to increase the share of equities in their portfolios, as well as obtaining permission to invest in foreign and foreign-

currency assets. This will remove a disabvantage the companies had been labouring under, not least compared with the banks' invest-ment foundations, and also reduce the larga share of life-assurance investments going

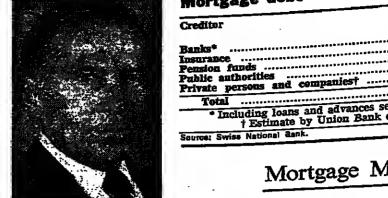

into the property sector. into the property sector. Apart from its dispropor-tutionstionately large insurance sector, Switzerland is also the home of a legion of pension funds. These "second-pillar" institutions have become even more significant since the 1985 Occupational Pensions Act laid down compulsory pension-fund membership for all employees earning over SwFr 16,560 a

On the one hand, this had led to the above-mentioned jump in new group policies for the Swiss life insurers and to a substantial increase—by 20.4 per cent in 1985 — in the holdings of so-called investment foundations, which manage portfolios for pension funds.

year,

On the other, it has meant the strengthening of one of Switzerland's most important groups of institutional investors. States Councillor Markus Kündig estimates total pension-

years. This is attributed largely to SwFr 140bn, of which about extremely tough competition SwFr 8bn is in the investment

Dr Walter Diehl, chairman of Swiss Re: hoping for further improvements in under-writing losses

foundations. While the latter figure seems certain to rise, pension-fund managers—parti-cularly those of major employers — are increasingly a force to be reckoned with. This will be even more the

case as they stretch their wings and make use of more enterprising investment opportuni-ties—always, of course, staying within the framework of statutes and common sense. Large sums are still placed with the funds' respective firms, most of the rest in low-interest bonds, property and mortgages,

bonds, property and mortgages. Early next year there should be a new yardstick at hand to measure how well individual funds are working, when the Swiss Bankers' Association introduces its performance index. This comparison will be available on a quarterly basis for compete pension-fund portfolios or separate investment

categories. One of the leading invest-ment foundations, the Invest-menstiftung für Personalvor-sorge (IST) is in the process of competing a similar commortgages are going at 5.25 per cent and some are even cheaper. Migros Bank offers 5 per cent and the Glarus Cantonal Bank recently offered a rate for local puter programme for its own members clients of 4.875 per cent. The Swiss mortgege system

siderably lower, only exceeding I per cent. Swiss are not only a thrifty people but they also have an eye to the main chance. Any further drop would be With mortgage rates the lowest anywhere and amortisabad news for the cantonal and regional hanks, of whose intail tion compulsory for only part of the debt, it is not surprising balance-sheet assets 55 per cent and 60 per cent, respectively. that they have run up a per-capita mortgage bill of some are accounted for hy mortgage or mortgage-backed positions." thing like SFr 40,000 (\$24,345). As to the interest rate, on

These banks are also under pressure in that competitors are oftan less dependent on mortgages or can help to conventional first mortgages it has never gone abova 6 per cent in the past 10 years and reached this peak only during a sudden hurst of inflation to the 6.5-per-cent mark in 1982. finance them from other sources. For example, the Big Five are keen to huild up their mortgage portfolios so as to kep Today, with the Swiss cost-ofa desirable balance between living index showing an annual increase of 0.4 per cent, most

Insurance companies and the fast-growing pension funds also have an edge over the traditional mortgage banks in rela-tion to financing margins, Furthermore, institutional investors are seen as tending to coocentrate on "easy" house and flat mortgages ranter than accounted for by the first higher-risk commercial property, There is e limit to what the mortgage, the principal of There is e limit to what the which does not nsually bave banks can do to widen the to be repaid. The remsinder is interest margin. Certainly in the form of a second mort-gage, interest on which is increase in the mortgage rate; increase in the mortgage rate; nsually 0.5 per cent, and norwhich will doubtless continue mally it has to be amortised under pressure. However, a signal has just been set by UBS, Nor has Switzerland special institutions like British buildas Switzerland's biggest single. hank, in cutting back all savings and deposit-account interest

ing societies or the German "Bausparkassen." The business rates by 0.25 per cent as of Jannary 1 in keeping with a corresponding drop in the mari-gage rate. Similar moves have of granting mortgages is divided into many totally different sources. Traditionally, the major suppliers of mortgage credit since followed on the part of other major banks. were the cantonal, regional and savings banks and the local loan associations and credit co-

Mortgage rates themselves are also a key economic indicator in Switzerland, so that increase in such a low-interest phase is politically out of the question.

of the Big Five but also from What is happening is a cold stant deversification within the mortgage sector by the intra-Estimates released by the Swiss National Bank in October duction of new lending patterns. put the value of outstanding One of the most successful of domestic mortgages (including these innovations has been the fixed-rate category which guarantees the borower a given interest rate for a period of three, four or five years—and can then be extended or changed into a normal variable— interest more and a-rate interest mortgage. This removes the uncer-tainty for the borower inherent in the traditional first and second mortgages, with their changing interest rates, while permitting banks to finance the loan with "Kassenobligationen" of matching maturities. Another approach, designed to appeal especially to young people who can expect to in-crease their incomes over the years, foresees a graduated interest rate for the initial period of e first mortgage. That of the Zurich Cantonal Back, or the zirich Cantonal Bans, for example, offers the capital-isation of 1.5 per cent of the interest in the first year, 1.25 per cent in the second year and so on down to 0.5 per cent in the fifth year the fifth year. The same bank also offers a "triple-phase" mortrage mortezee whereby five-year first and second mortgages for own-use homes offer interest down by 0.5 per cent in the first and second and 0.25 per cent in the third and inerth years years Yet another possibility is the Yet another possion of the bank annuity mortgage whereby a set sum is paid to the bank At stable interest rates the amortisation share will increase while that of interest decreases. Alterations in the mortisation Alterations in the moriga rates are reflected only in the amortisation sum. The newest programme of some cantonal hanks is the re-novation mortrage, offering what is normally a 1 per cent period for similar - removation costs. Under the Baske Cantonal Bank'e "Remova" phan. these amount to SwFr 100,000 for a one or two-family house or up to SwFr 250,000 for larger properties. Innovation in property finan-Innovation in property finan-cing is not restricted to the cantonal banks, Crédit Suisse, for instance, last year info-duced a "home buyer's account" as a new savings instrument. Account-holders who buy fielr own homes after saving for at least three years receive a 30 per cent premium on their gross least three years receive a 30 per cent premium on their gross interest receipts. As to the institutional sector, the investment foundation 1ST is considering the creation of a mortgage fund, while indi-vidual investors would no doubt take advantage of any statutory move to promote property own

### More than just private banking

Geneva's private bankers: so discreet that most of them don't even have their names on their doors.

Generation after generation, their clients' satisfaction is the best advertising ....

For centuries, Geneva's private bankers made their reputation in offering the best services and very personalized relations with their clients.

Yet Geneva's private bankers well know that such a reputation can only be maintained through permanent innovation. Hence their great tradition of money management capability remains unequaled.

operatives,

Fund). The remainder is made up, according to Union Bank of Switzerland calculations, of about SFr 5.4bn granted by private persons and companies. Demand for mortgages shows Demand for nontgages shows no. signs of flagging. Latest Netional Bank figures show that in August the total mortgage and mortgage-secured debt of 368 reporting banks was up by some 94 per cont over the same some 9.4 per cent over the same month of last year. Given cur-rent prosperity and the high cost of Swiss land and building, real growth is set to continue at least until the end of next year. This does not necessarily mean a corresponding growth of income for the lenders. Indeed, serious concern is heing voiced by the traditional operators in the light of nar-towing interest margins. The operators in the light of har-rowing interest margins. The rule always used to be that mortgages would be largely financed by interest received on savings accounts. This is cur-rently set at about 3.5 per cent, which in itself provides a

sufficient margin. But the trouble is that the banks can cover only a declin-ing share of the burgeoning mortgage volume from their sevings books. According to Mr Fritz Studer, of tha Lucerne Cantonal Bank, the coverage rate was of about 90 per cent sufficient margin. rate was of about 90 per cent in 1975 — but only 67 per cent today for hanking as a whole end 65 per cent for the cantonal banks.

banks. Not all bankers suffer from this development. Mr Walter Ruegg, chief executive officer of Swiss Volksbank, says his hank pays for over 90 per cent of its mortgages from savings accounts — a result not least of co-operation with institu-tional investors in this field. Generally speaking, however, more and more mortgaga husi-ness is having to be financed by the banks' own medium-term, over-the-counter bonds (so-called "Kassenobliga-tionen") currently paying 4.25-4.75 per cent or capital-market issues.

The theoretical interest marthe theoretical interest mar-gins of harely 2 per cent sre themselves much lower than those common in other coun-tries, says Mr Studer, pointing to comparable levels of 3.4 per

#### SMALL BANG AT BASLE STOCK EXCHANGE

### Continuous trading possibility during stock exchange hours will be extended to all Swiss shares

The positive experience since inauguration of continuous trading in 61 selected Swiss shares, in October 1986, caused the Committee of the Basle Stock Exchange to extend this trading possibility: In a few days all Swiss shares can be traded continuously on the cash as well as on the forward trading market up to nine months.

#### Bond Trading handled by " post "

In addition to the above extension of continuous trading possibility, the Committee of the Baste Stock Exchange decided to handle the flow of bond trading in listed issues in the near future by a "post" and the maintenance of an order-book kept by market makers. With this decision, the board of the Basle Stock Exchange choose a completely new path and herewith limits the commercial usage of the system "à la criée."

Kurt Hauri, director of the Federal Banking Commission

posed by the Banking Act on public bond issues were applied to the notes, he believes. "We will not reduce the

scope of our surveillance but wo shall not try to increase the number of regulations," is how Mr Hauri sums up the commis sion's philosophy. To undertake the more thorough-going surveillance be appears to envisage, ho commands a unit of only 28 lawyers, accountants and

### Profile/Arthur Bolliger

### In the right place at the right time

ARTHUE BOILLIGER is one of the Bright Young Men of Swiss banking. Still only 38, he has been president and chief executive officer of Royal Trust Bank (Switzer-land) and its fore-runner Dow Banking Corporation for over three years. In a business where youthful enthusiasm in birth places is at something of

three years. In a summers where youthful enthusians in high places is at something of a premium, he is one of tho notable exceptions. His curriculum vitae reads like the Filgrim's Progress of a modern banker. A mative of the hill canton of Appen-rell-Ausserrhoden, from which he still commutes to Surich, Mir Bolliger started of his career with an apprenticeship at the St Gall branch of Crédit Suisse, followed by a trainceship with Crédit Com-mercial de France in Paris to learn more about the credit business.

At the heary age of 21, he decided that Luxembourg had a future as an international financial centre—and moved house accordingly. For the nouse accordingly. For the next four years he worked with Banque Lambert-Luxen-bourg at its head office and in Brussels. This got him into the then new Euromarket on the second floor.

the then new Euromarket on the ground floor. "I was dealing with the first wave of American and Japanese convertibles when hardly anybody knew what they were all about," he says today. The Lambert parlod also gave him valuable experi-ence in portfolio management, not least in connection with the popular Luxerabourg mutual funds. the popular Luxembourg mutual funds. After a time, however, Mr

Bolliger came to realize that Boliger cane to reache that the Grand Duchy was not going to make it quite to the top. Looking at the market, he came to the cenclusion that one interesting new development was the growth in Scandinavian berrowings. in Scandinavian berrowings. So he joined Dow Banking Corporation in Zurich as their area manager for Scandinavia, soon opening np the bank's representative office in Copen-

hagen. Ho had chosen the right time and the right place again; about one-third of Dow Banking's total loan portfolie came to consist of Scandima-

vian icnding. By early 1975 ho was back in Switzerland to take over as head of the bank's world-wide credit marketing, subse-quently moving to London as heaved manager. By them branch manager. By than another new wave had arrived. "We were practic-ally a Japanese bank, at least as far as our London operaas far as our London opera-tions were concerned." Two years later, he made yet another move to yet another activity. The majority shareholder of the bank, the US-based Dow Chemical Com-pany, appointed him assistant treasurer of its regional sub-sidiary for Europe, Africa, and the Middle East in the Zarieh suburb of Horgen. Here he was responsible for the substantial volumo of day-to-day financial manage-

Arthur Bolliger, chief execu-tive of Royal Trust Bank (Switzerland)

Although commission in-

Although commission in-come is growing, Mr Bolliger does not subscribe to the idea that fee-based business is all that matters. He is proud of his hank's considerable expertise in cerporate financ-ing (not normally much of a Swiss speciality) and also points to its substantial capital base. His ahm is some-thing like a 50-50 split between balance sheet and off-balance sheet husiness. the substantial volumo of day-to-day financial manage-ment within a multinational, particularly in the fields of currency management and project financing. In 1981 he went back to the bank, first as assistant chief executive officer, subst-menting as CEO and them

He agrees with these who claim that Switzerland is under pressure from other international financial centres, chief executive officer, subsc-quently as CEO and then additionally president when another Bright Young Man — Canadian Les Merszei — left Zurich for London to set up Dow Financial Services. At the takeover of Dow Banking by the Toronto-based Royal Trustco in June, he retained is existing positions. When he assumed respon-sibility in Zurich, Mr Bolwhich frequently prova more innovative, are free of certain fiscal hindrances present in Switzerland, have strong national economies behind them — and are not subject

to the serious shortage of skilled manpower which sibility in Zurich, Mr Bol-liger's main task was to build bedevils Swiss hanks. In the long term, though, he is convinced Switzerland will win through. On the other hand, competitor counup non-interest activities in what had hitherto been a vir-tual "lending monoculture." This meant specifically tho tries have potential problems of their own: Britain and Germany, for example, are threatened by "political Damocles swords," while the US, West Germany and corcreation of a proper portfoliomanagement and securities-trading arm. His success here obviously impressed Mr Michael Cornelissen, the dynamic boss of the new tainly Japan are very much national rather than intermajority shareholder, Royal national stamping grounds.

cries in the world-th not least to the policy of the watchdog Banking Com-mission-and are less likely to engage in experiments whose risks have not yet been sufficiently calculated.

On the other hand, Switzer-land should benefit from its

innate stability, its long bank-ing tradition and the high quality not least of its middle

At the same time, he is convinced Swiss banks have the strongest financial re-

lower management

As to the fiscal disadvan-tages, he admits that the effect of the recent tax reduc-tions has been "negligible" but stresses the psychological importance of the govern-ment move. For all that, "Switzerland should not have delusions of granden. Wo are only a small

grandeur. Wo are only a small country with a small domes-tic market. But we have got excellent relations with the outside world. This means that we Swiss can keep up a leading position in certain niches—ouch as investment counselling in its broadest sense, capital-market business, currency and precious-metals currency and precious-metals dealing and, of course, the

Swiss-franc sector." Within Switzerland, the foreign banks can compete with the big Swiss banksthough again in niche activities and not across the board, Mr Boliger says. In time, he wants Royal Trust Bank (Switzerland) to become the leading Canadian bank there. However, he stresses that "1 do not want to be known as a Canadian bank as such, but rather as a Swiss investmentmanagement and merchant bank with a powerful Cana-dian shareholder-in other words, a Swiss bank based on Swiss portfolio-management traditions which profits from the Canadian link."

John Wicks

### The bourses are now getting their act together

THE SWISS stock exchanges have finally emerged in 1986 from the inertia in which they were drifting at the beginning of the decade and are now moving at a canter, if not at e gallop, towards becoming an internationally competitive mar-ketplace for both Swiss and foreign ecurities.

Foreign investors, particularly the large institutions, to which the Swiss banks look for profitable fund managing business, bave acted as a spur to modernisation. In some instances their criticism and demands have produced startling results, such as last month's innovating issue, by the smart, young BZ Bank, of warrants covering the sacrosant registered shares of Swiss companies.

Credit must also go to the tripartite bourse commission, which is co-ordinating planning by the three big Zurich, Geneva and Basle exchanges. It is push-ing through, with some predict-able slippage in timetables, an ambitious programme for computerisation and the introduction of new trading instruments, that new issues and capital which should culminate early increases in the equity market in 1988 with the establishment totalled e record SFr 6.7bn in

of an options market in Swiss the first 10 months and should shares. Trading in shares and honds by the end of the year. That this year has not repeated the is equivalent to almost 4 per dramatic performance of 1985, cent of the Swiss market's total s of an options market in Swiss shares. Trading in shares and bonds the first 10 months and should approach the SFr 7bm mark approach the SFr 7bm mark by the end of the year. That is equivalent to almost 4 per cent of the Swiss market's total capitalisation. During the period 1979 to 1984 total annual dividend pay-ments by Swiss companies regu-larly exceeded the volume or new equity raised. The situation to SFr 451.7bn (\$266bn), the Swiss Bank Corporation index climbed 57 per cent to 636 for Sorr cent in market value. Nevertheless, at the 10-month stage this year trading in curich had already reached period of 1985, while in the first more than in the comparable to in turnover to SFr 179.5bn. Rates of growth differ because turnover is measured by the taxes paid on transactions to the cantomal treasuries and the particularly in institutionally curick former in the first 20 to strate of the Swiss market's total the cantomal treasuries and the particularly in institutionally 
out difficulty so far but Bank Vontobel gave a warning that, while the build-up of capital, particularly in institutionally managed funds, continues re-lentlessly, investors are becom-ing more critical towards capital the cantonal treasuries and the Zurich figures include the large volume of new accurities issues lead managed there by the big Swiss banks, although 30 to 40 per cent of them may be placed ing more critical towards capital increases and the use to which they are put afterwards. Of the total volume of SFr 6.7bn in new equity raised

in Geneva. Bank Vontobel bas calculated in the first 10 months, issues of bearer shares with limited voting rights came to SFr 3bn and

those of participation certifi-cates with no voting rights to SFr 2.7bn. Only SFr 920m came from new issues of registered shares with full voting rights. companies Swiss

ban holding foreigners from holding registered shares. The practice was introduced in the 1930s to prevent Swiss enterprises being taken over by politically un-desirable foreigners, and justi-fied in the 1970s as a way of stopping coll-rich Arabs from supping out-field Araos from gaining control of Swiss firms. For many foreign investors the inaccessible Swiss registered shares are an irritating abnormality in the era of the globa-lised equity market. Foreign interest for Swiss shares has been forced to focus

on the bearer shares and parti-cipation certificates with the result that the bearer shares of blue-chip Swiss companies have been trading at premiums of 100 per cent or more over the registered shares.

shares in several leading Swiss stocks, including those of Nestle and Sandoz. A market started with warrants trading at 20 per cent or more above their issue prices. The City of Zurich launched 10-year bonds linked to three-year Ciba-Geigy war-rants issued by BZ Bank. This anomaly was exploited by Mr Martin Ebner, who founded BZ Bank last year and became the first newcomer to win a seat on the Zurich stock will a seat on the Zirrich Stock exchange for 20 years. He per-suaded some institutional in-vestors to deposit with BZ Bank 100,000 registered shares of Ciba-Geigy, the chemicals and pharmaceuticals group. rants issued by BZ Bank. Companies quickly warned that they would not register changes of ownership to foreigners but Swiss investors,

BZ Bank then issued 100,000 warrants at a price of SFr 350 each, carrying the right to buy the Ciba-Geigy shares for SFr 1,950 each any time during the next three years. The mar-ket price of the shares was SFr 1,840 at the time.

William Dullforce

Why gold? The gold price usually moves independently of paper investments and therefore tends to have a stabilizing effect on your portfolio. You can't be sure which way the investment

market will go. But if you put part of your port-folio into gold, you can be sure your paper investments are better protected.

More information on how to secure your financial assets in gold is given by the newly published "European Guide to Gold" which reviews the key aspects of investing in gold in 21 European countries. For example:

How freely can you bring gold in or take it out of . your country of residence?

Are there advantages to be gained by buying and selling gold outside your country of residence, e.g. Switzerland?

The 60-page booklet also provides you with a valuable list of the names and addresses of leading gold specialists in Switzerland and in other European countries.

Ask your Swiss bank for personal advice on gold or write for your free copy of "European Guide to Gold," simply to:

> Gold Information Centre - F2 B.P. 351 - CH - 1211 Geneva 3 - Switzerland.

early 1988. The Geneva and Basle exchanges occupy bigger, new premises.

Segning A market in covered warrants on the registered shares of lead-ing Swiss companies may be taking shape after their con-troversial introduction last month by an enterprising young bank. The companies fear that the warrants could be the pre-cursors for a more direct assault on the registered shares have pointed out, mean that the Swiss franc issuing business would move to London. in which ownership is But lifting the stamp duty entrenched.

and opening the way for a re-vival of Eurobond business in At this stage it may still be unthinkable that prestigious vival of Europond pusiness in Switzerland would also put moral pressure on the SNB to abolish the stipulation that Swiss franc bond issues must be lead-managed by banks domiciled in Switzerland. Stamp duty relief would seem Swiss companies should ever be subjected to takeover bids of the kind common enough in New York and London. But the arrival of the warrants and the voracity with which they were snatched up demonstrates that to be inertricably linked with liberalisation of the Swiss franc the Swiss stock exchanges are immune to not cheeky bond business. innovations.

For the time being at any rate, however strong the flux of change in the domestic financial markets instigated by With three small tax conces-sions the Federal Council has this year partially acknow-ledged the validity of the bankers' long-running campaign against the stamp duty and other fiscal charges on financial international competition and their own regulating bodies, the Swiss banks continue to flourish. After the 18 per cent climb

other fiscal charges on financial transactions. The banks argue that the duty, which in 1986 will bring in over SFr 2bn to the federal coffers, puts banks in Switzerland at a competitive disadvantage compared with banks in London and other financial centres. in net eurnings recorded in the SNB figures for 1985, bankers were cautious at the beginning

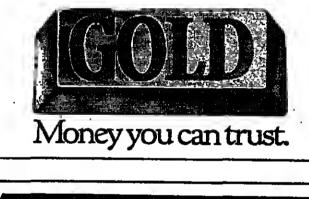

were cautions at the beginning of the year in forecasting the outcome for 1986. Now, although some slackening may have appeared from the third quarter, analysis are predicting another profit advance of between 15 and 20 per cent. In September, the Council trimmed from 0.3 per cent to 0.15 per cent the duty charged on Eurobond subscriptions on burboond subscriptions made through Swiss banks. It abolished the 35 per cent with-holding tax on the interest paid on interbank credits: before interest had been exempt from tax only if the iterm of the denosit was one near or bes Once again the main earnings generator seems to have been the fee-based securities business rather than traditional lending, although a recovery in banks' net interest income was a feature of 1985 developdeposit was one year or less. It removed the 6.2 per cent value-added tax on sales of fine ments. The question of capital cover for the banks' swelling off-balance-sheet business pre-occupies the Federal Banking k removed the old per term value-added tar on sales of fine gold and gold coins. A modest step in the right direction, the bankers said but larded their thanks with a reminder that they were still looking for action on the more stamp duty on Eurobond trad-securities business done through Swiss banks. Something of a Catch-22 situation prevails over the stamp duty. The SNB with the

help of other central banks has ments are among the stiffest. Exchange rate developments were cited by the SNB as being succeeded in preventing the emergence of a Eurobond market in Swiss francs giving banks domiciled in Switzerland a largely instrumental in the four-point improvement in the ratio. Nevertheless, the figures for the five hig banks show that they raised SFT 1bn in new share monopoly over Swiss franc bond Bemoving the restrictions on Removing the restrictions on Swiss franc capital exports, as the SNB has hinted it may even-tually have to do, if it should lose the complicity of other cen-tral banks, withont lifting the stamp dnty would, as the banks have pointed out, mean that the Swiss franc issuing business Swiss franc tasting business

Credit Susse.) That financial muscle gives credibility to the big three banks' declared intent to keep their place in the international banking sun. Wherever the their place in the international banking sun. Wherever the main action is, New York, London, Tokyo, the Swiss are there in strength. This year they have staked out their posi-tions in Japan, being among the first foreign banks to win security trading licences in Tokyo. Tokyo.

Penetration in force of West Germany started as soon as the Bundesbank liberalised its capital markets. Credit Suisse capital markets. Credit Suisse this year merged into one operation the two local banks, Grundig Bank and Effecten-bank Warburg, it has bought. UBS took over Deutsche Lander-bank at the end of last year, and SBC, which set up it own bank in Frankfurt, has just doubled its capital. Competitive internationalisa-tion was singled out by respon-dents in the survey of Swiss financial prospects recently published by Arthur Andersen, the management consultants, as

financial prospects recently published by Arthur Andersen, the management consultants, as one of the most important modifying influences on the structure of Swiss banking over the next 10 years. In general it was expected to work to the edvantage of the big banks and the foreign banks established in Switzerland. Swiss banking has been flosing some comparative ad-vantages as deregulation pro-ceeds abroad, capital restric-tions tumble and others adopt the Swiss traditional universal banking system. Under the mutations now taking place, Swiss bankers regard it as vital to consolidate those still available-political neutrality, sound government finance, low inflation coupled with steady economic growth, efficient domestic markets and not least the bank secrecy which still inspires the confidence of foreign investors.

We may just be the second bank you've been looking for.

In Switzerland.

We would be pleased to welcome you to Geneva and personally consult with you on all your banking affairs.

ENTREPRISE NATIONALE D'ENGINEERING PETROLIER (The National Enterprise of Petroleum Engineering) ËNËP

The ENTREPRISE NATIONALE D'ENGINEERING PETROLIER (ENEP) (The National Enterprise of Petroleum Engineering) participates in the following fields:

- Hydrocarbons production and treatment
- --- Hydrocarbons distribution and transport
- Petrochemicals -----
- Chemicals

-

- Harbour infrastructures specific to liquid and gaseous hydrocarbons
- Hydraulics \_

#### SERVICING:

ENEP offers the following services:

- Consulting
- Engineering and procurement
- Projects assessments -----
- Technological processes \_
- Managerial projects
- Industrial services and exploitation assistance

#### IT IS ALSO:

- A flexible organisation under its customers' services
- Services adapted in the best interest of the projects and to the needs of its customers
- A technological gathering tool, in the service of the development of the petroleum industry, gas, petrochemicals, fertilisers and associated industries

#### ABROAD:

ENEP participates as an assembler for the refitting of the Nouadhibou refinery (Mauritania). This consists of the renovation and building of L.G.P. extracting units, a de-salination unit and updating of harbour amenities.

ENEP has produced a technico-economic study with TECI (Tunisia) for the preparation of a feasibility study for an Algerian-Tunisian nitrophosphates complex.

### The economy **Policy changes**

speeded up as

exports fall FOR the first time since the quadrupling of oil prices in 1973-74. Algeria's gross domes-tic product will, this year, fail to when the country's foreign income has fallen so sharply presents President Chadli with his greatest challenge since he took office took office. Over the past five years the high level of investment has allowed a fast rate of growth, the creation of many oew jobs and significant progress in social welfare. But the compari-son between the high rate of capital formation and the rate of expansion still implies a low return on investment. expand as fast as the country's population-29 and 32 per cent

Real GDP rose 8 par cent last year. It was helped especially by a good agricultural perform-ance where a humper crop douhled the output of cereals. This year the Government has

to DN 93bn (\$20.09bn) and imports hy one third to DN 30bn (\$6.48bn), as the country's sales return on investment. Senior officials in Algeria insist that the greater flexibility in prices introduced in recent years, the re-organisation of public enterprises (whose num-ber has increased eightfold to 482), decentralisation and the insistence on higher productiv-ity, with the greater role given return on investment. (50,450m), as the country's sales of hydrocarbons, which account for 97.8 per cent of its foreign income, have fallen by 40 per cent from last year's figure of \$12.8hn. ity, with the greater role given to private enterprise all amount

\$12.8hn. Hydrocarbons will account for 32 per cent of hudget receipts this year egainst 40.4 per cent last year. Despite the present adverse situatioo, the development of the economy is of paramount importance and investment this year will amount to 31 per cent of GDP against an average of 40 per cent between 1980 and 1985. The fall in export earnings is

also hastening many of the chaoges in economic policy which an earlier reassessment, made in 1979-80, had hrought made in 1979-80, had brought about. This reassessment showed that the policy of very bigh rates of growth conducted since the mid 1960s was not without shortcomings. in par-ticular, a lower investment priority for other sectors, parwage income. ticularly agriculture and the concentration within the indust-

rial sector on steel and petrochemicals. This in turn led to the emergeoce of a small number of major industrial corporations like Sonatrach (oil and petrochemi-cals) and SNS (iron and steel), which tended to reinforce the ceotralising and hureaucratic tendencies within the economy. Sioce 1980 there has been a marked shift away from heavy industry aod towards agricnl-ture, public works, education and bealth. But progress has in

The Government's policy nf "vérité des prix," which seeks to ensure realistic pricing, continnes and prices of many pro-ducts in beavy and light mannfacturing are being revised to reflect actual costs. Producers prices for those crops which are delivered to official buying agencies were raised last year by between 20 and 25 per cent and further increases were coforced this year.

The price of cereals, edible oil and books continued to be shisidised through the hudget at a cost of DA 23bn last year, while the prices of milk, sugar year, was a rising per capita Key economic statistics

reduce imports hy 30 per cent while emphasising the urgeot need to develop the fledgling noo-hydrocarbon sector. But with such exports accounting for less than 2 per cent of the total its impact is unlikely to be dramatic in the short-term. In addition, oil and gas exports are denominated in dol-lars. This favours tha sector when the US currency is bigh but hlunts tha competitiveness of other exports two and in of other exports transacted in softer correncies. softer correncies. Last year Algeria recorded a \$3hn trade surplus which almost compensated for its ser-vices deficit. But this year it will have a struggle to keep its trade halance near equilibrium. In recent years consumer goods have borne the brunt ol import cuthacks and last year stood at 12.8 per cent of the total against 16.2 per cent in 1988. Foodstuffs, which had slid to 17 per cent of 1984 imports, rose to 22 per cent last year. Tha Government tries

The Government tries whenever possible to insist on "balanced trade"—In particular with European countries, which it considers its natural markets for hydrocarboos. But with countries as powerful as Japan aod the US It lacks the muscle to proce for a balance and is there press for a halance and is there-fore less insistent.

Counter-trade is another feature of Algerian economic policy as a means of conserving policy as a means of conserving foreign currency. Foreign com-panies complain that the prac-tice is on the increase, that it complicates negotiations and raises the costs of contracts. But in the Algerian view counter-trade is only another aspect of trade is only another aspect of the balanced trade philosophy. Historically, France has been Historically, France has been the country's main trading part-ner. Fifteeo years ago France supplied 30 par cent of imports. This concentralinn nn a single market left Algeria dangerously exposed and when in the 1960s

France refused to buy wine-france refused to buy wine-then a major export-earner-from the newly-independent country. Algeria was forced to barter it at lnw prices to the Soviet Uninn or dump it in large quantities.

Only in recent years, as homes and state company cof- attempts to unshackle the eco-

tion of a centrally-planned ecooomy (with its consequent rationing of capital and con-sumer goods) and age-old mis-trust of the state effectively undermines the rôle of money; To support the restructuring of public coterprises a oumher of changes have already been made in the foancial system. Decentralisation of decisioo-making away from head offices, io particular, has been eocour-aged. The authorities have sought to make the hanks mohilise and channel savings to com-panies io deficit rather thao

those in surplus. In this context a broader raoge of financial instrumeots has been made aveilable to savers. Most commercial hanks are likely to he involved increasingly in fioaociog medium aod long-term iovestment projects.

Some Algerians are oow suggesting that investment projects be split into two categories: those written into the Economic Development Plan, which the banks would be ohliged to finance; and those where particular state companies would have to convince the bank that what they wish to do is econo-mically viable.

If implemented such a divisioo might eliminate many wasteful or oversize projects; but if it is to succeed the senior staff of all Algeriao banks will need to be strengthened aod many more managers trained io the skills of project assessment-no easy task in a country which has inherited archaic practices of old Freoch state style hanking aod which often

prefers to observe the minutiae complicated rules rather than take a bold initative. The Banque de l'Agriculture

et du Développement Rural has demonstrated, however, that if

and when, as today, there are fewer consumer goods and less credit available, the hoarding of paper money grows—hence the relatiooship betweeo the prio-ting of oew mooey aod inflatioo is distorted. Mooetary growth last year was reduced from more than 20 per ceot a year io the early 1980s to 14 per ceot—a figure close to the rate of inflation. The Ceotral Bank has deliberately tighteoed

avoid delays io repayment, especially on one-year loans intended to help farmers through the winter mooths.

The Dean of the Economics

III

the

its monetary policy and the volume of savings has increased. This policy will oo doubt be malotaiced, which is all the more necessary io a year wheo the budget deficit will

reach ebout DN 14bn. Last summer, the banks allowed Algerians to open long-term foreign curreocy accounts with no questions asked. Many people did so in the hope that it would make travel abroad easier at a time wheo the official allocatioo of foreign currency had been severely cnt back. Meanwhile, this edds a small but useful sum to the

dwiodling foreign reserves of the Central Bank, If Algerien baoks offered more attractive terms than the 7

per cent for five years tax free which the Banque de l'Agricul-ture et du Développemeot Rural announced last summer, savings could be more easily mobilised. At a time when the sharp fall in foreign income is cutting deeply

ioto the funds available to finaoce domestic expenditure such a policy would make sense.

The Banque Nationale d'Algérie plays a major part in the financing of the economic development of Algeria - celebrates this year the twentieth anniversary of its establishment — it's a modern bank that promotes its international relations with efficiency and long-term co-operation.

A well-known institution on the international financial markets, the Banque Nationale d'Algérie is a highly regarded " signature."

The Banque Nationale d'Algérie, with its presence throughout all banking fields, a large diversity of customers (state owned or private enterprises), both industrial and commercial and a worldwide network of foreign correspondents, is your natural partner for any business in Algeria.

### Private sector development

### Entrepreneurs re-emerge

playing a more open role.

UNTIL RECENTLY, visitors to Algeria could bava heen for-given if they failed to notice that tha country possessed an enterprising class of private entrepreneurs. Up to the late 1960s, private

Up to the late 1960s, private hnsinesses were encouraged, particularly in the textile, leather, plastics and food pro-cessing sectors. However, throughout the following decade, the increasingly stri-dent and dour Socialist doctrine preached by the coontry's political leaders appeared to threaten the very existence of threaten the very existence of such entrepreoaurs, whose activity was often described as "parasitical" and "exploita-tive". People who owned factories.

most of which were and still are concentrated around Algiers concentrated around Algiers and Oran, kept a low profile. Getting to know such people was almost impossible, espe-cially for diplomats. Discretion was essential and many of these people were not allowed to renew the machines they had bought when they started up a business, lat alone expand their business, let alone expand their factories or huild new ones. Most aotrepreneurs sprang from the ranks of wholesale traders, who often had foreign partners of the later colonial

days. As the years passed most of them sought discreet protection bigh up in the establish-ment. "Non exploitative" pri-vate industry was recognised in the Netional Charter ratified in 1976, but the climate of the later Boumediene years was not conducive to any great expansion.

After the accession to power of Col Chadli Bendjedid, in 1979, a freer climate prevailed and a thorough rethink of former ecocomic policies began. The role private eoterprises had played was recognised, and it was now encouraged.

Private industry did not rush to expand, however, and few new projects were started, so deep did suspicion run that the new economic policy could not take root. Over the past two years,

however, eocouragement has been offered on a far greater scale than before, not only in the farming sector hot also in industry. New factories, usually fairly small, have been set op

> Historical perspective

goods. Older factories have been able to re-equip while in Oran e whole new private enterprise zone bas been set up near Es Senia airport. Drivate shops, restaurants Senia airport. Private shops, restaurants and hotels, have sprung up in far greater variety than before, but starting up a private busi-ness in Algeria is still a difficult and expensive operation. Three to four years for a plant employing fewer than 50 people is not uncommon.

However difficult it remains Algerians bave but one dream-to be their own master or work is not uncommon. The ownersbip of such husinesses remains shrouded in in a small private company-and thus avoid joining state companies whose reputation as employers has declined in in a small private company-and thus avoid joining state low profile until 1980. companies whose reputation as employers has declined in recent years. Salaries there, at least so far as skilled workers the service industry. Is con-are concerned, are not very siderable. There is no shortage of private canital in Algaria but mystery, although the new chambers of commerce are now A sense of progress is unmistakable, however, and the sharp decline of the country's foreign are (

### ENIKEPRISE NAHUNALE DES PEINTURES

(National Enterprise of Paint)

### **COMMERCIAL DIRECTORATE**

### SALES DEPARTMENT

### PAINT IN ALGERIA AND ITS DEVELOPMENT

Holder of the National Monopoly of paint production in Algeria, ENAP has seen an annual increase in activity, with production constantly improving (yearly growth rate of 22%). There is a staff of 1,750 of which 18% are highly qualified.

It holds its performance with the quality of its products and competitive prices. Apart from the supply of paints on a national scale, ENAP has moved to the International market.

With a very diversified range of products (building, anti-corrosion, coachwork, industrial, varnish etc) ENAP is able to satisfy all requirements notably quality.

One of the strongest production points is its ability to keep abreast of technical progress. For this reason ENAP intends to diversify its production as much as possible and to adapt to all the latest techniques thus catering to all tastes with its wide colour range.

Its presence has already been noted with its participation at various national and international fairs.

Among its products, the most outstanding are: Glossy glycerophtallic lacquer, " Glylac 2000," rough cast "arrls" for wall decoration, vinyl emulsion, "Blanroc super."

WHEN THE first shots were fired on November 1, 1954, at tha stari of the "evenements d'Algérie," in a remote area of the barsb Aures mountains. none of the participants in what was to become one of the bloodiest wars of liberation this

ceotory ever dreamed that Algeria would be independent less thao eight years later. The six members of the Revolutionary Unity and Action Committee who had decided to begin open warfare on France faced some formidable ohstacles. They would have to start guerrilla-style operations in a country which had been for over 70 years a part of France, three "départements " in fact.

Algeria bad more than 1m European settlers. To establish their authority over the bun-dreds of thoosands of Algerian

France financed much of the war hut its role was recognised only after President Chadli Bendjedid came to power in 1979.

iedge of the French Govern-

ment

Meanwhile, after the signing of the Accords d'Evian between France and Algeria in March 1952 the Armée de Liberation Nationale nnits based in Tuni-sia and Morocco returned to Algeria in July 1962 to play a crucial role in helping the char-ismatic Ahmed Ben Bella and the chief of staff of the ALN, Col Houari Boumedieone take power. The Government Provisoire de la République Algérieune, preaided over by Ferhat Abbas, was effectively scuttled.

Three years of increasingly demagogic rale were brought to an end on June 19 1965 when Coi. Boumediene staged a hloodless coup. Ironically, the tanks which were out in the streets for the shooting the film "The Battle of Algiers" were put to real use that night

to real use that night. In the years that followed. President Boumediene began a campaign to educate a popula-tion which was 85 per cent illiterate, build a beavy industrial base, socialise egriculture rial base, socialise egriculture and set up the administrative machinery of a modern state. In foreign affairs his strident plea that a greater sbare of wealth from the North be granted to the Sonth caused admiration but more often annoyance in diplomatic and governmental circles in the West circles in the West.

Circles in the West. Many people who knew Algeria paid trihute to lis yong, often gaunt looking but well-briefed diplomats, bowever. The decision to nationalise foreign oil interests, especially French ones, in 1971 ied to open economic warfare led to open economic warfare.

Three years later the quadru-

Three years later the quadra-pling of the price of oil put Pre-sident Boumediene on to tha world stage as Algeria initiated the first special United Nations conference on issues which had previously not been of great interest in Moscow, Washington, Paris, and London. But the other side of the coin was the increasing harshness of the regime, the collapse of agri-culture, which resulted from the "Révolution Agraire," and the slow deterioration of urban liv-ing conditions. However people-were promised and got cheap food, heaith care, education. The achievements in develop-ing bydrocarbors were impress-ive. The past still hangs heavy as Algeria seeks to establish its Own cultural identity in a psychologically confusing situa-tion created by heing both Arab and African, Third World and Mediterranean, Islemie and socialist.

### TRANSFORMATION DES PRODUITS PLATS

The ANABIB Organisation turns steel products into finished goods ready for use. ANABIB is Algeria's leader in the production of tubes and light and heavy sections which can be delivered coated or uncoated ANABIB is at the Service of:

#### --- THE CONSTRUCTION INDUSTRY:

- welded tubes in light and medium series, black or galvansized for piping water and gas
- · Narrow tubes in different forms for metalwork and boiler-making
- Various cold sections, coated or uncoated.
- Shaped plates

-THE HYDRAULIC INDUSTRY:

Welded tubes, coated or uncoated, for water pipes

### -THE HYDROCARBONS INDUSTRY:

- Spiral welded tubes for piping oil and gas
- -PUBLIC WORKS
  - Security slides with accessories
  - Guard rails for Bridges
  - Light Sheet Piling
- -AGRICULTURE
  - Products for irrigation and plasticulture

These products are made according to International standards

The law, the first comprehen-sive piece of oil legislation to have been drawn up, makes several important concessions. including giving foreign com-panies the chance of a share in gas flods, which previously were automatically claimad by Sonatrach, the state-ownad oil company. However, higger incentives

will probably be needed to send foreigners rushing to Algaria, reversing the exodus that has taken place over the last faw years. Following the collapse in the price of oil, companies ara desperately looking for ways to cut, not to streich, their explora-tion hudgets.

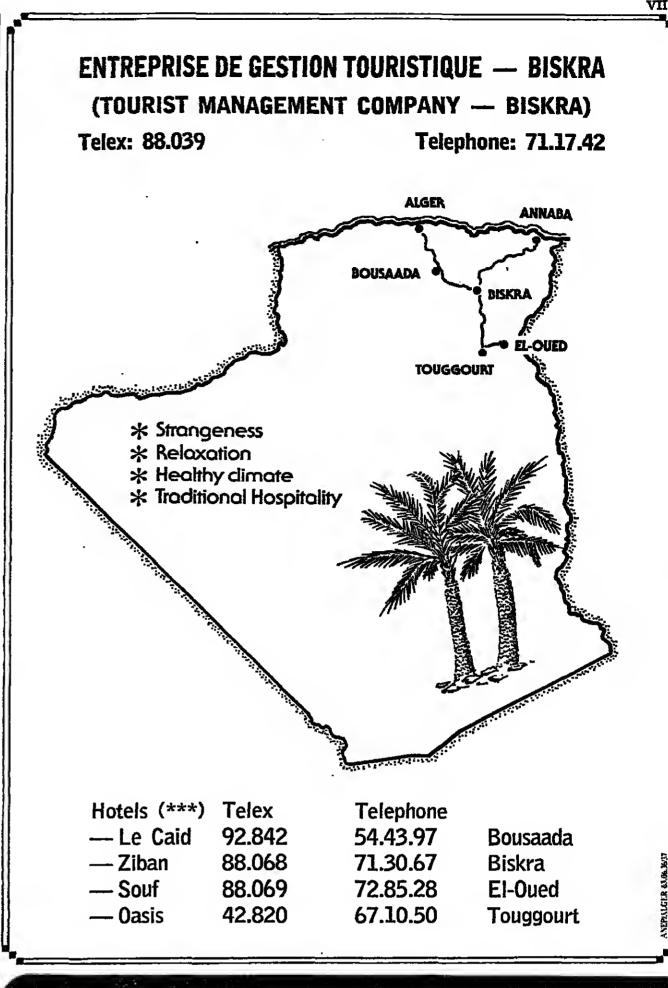

Three years ago the Govern-ment became concarned at the slide in drilling activity, aod

while LPG costs roughly half as much. By its own standards this scheme has been moderately successful, and has nt least eut hy hnlf the annual growth in petrol damand in Algeria's car crammed citles. However, the policy itself does not seem to have heen well thought through the new set of the norm poses few problems as an poses few problems as an export, whereas the costs of distributing it widely and stor-ing it for the convenience of evary converted motorist are signs that the Government is prepared to opt for the more raasonable South American solution of converting cars to run on mathane, and instead is planning to press ahead with i00,000 LPG conversions (at rian drilling firms.

Soma hava found that the soma nava tound that the Industry operatas increasingly inafficiantly. Exploration walls which should take about threa months to drill can now taka up to a year, with spare parts often difficult to obtain.

Soma US companias have esti mated that the cost of drilling in Algeria is now about DN 8,000 a metre, making it one of the most expensive onshore drilling areas in tha world.

Nevertheless, the chances of Nevertheless, the cashes of finding oil and gas in Algaria remain good. Sonstrarh esil-matas that less than half of its racoverabla resarvas have been on pouring ont well into the next century. Not merely scarce, oll is also cheaper and easier to export than gas, making it important to use gas wherever possible for domestic needs. Since the first gas came on straam in the mid-1970s, huge investments have been made in the mid-1970s, huge investments have been made in the on operol, which can be more profitably exported. The public sactor's large fleet than on petrol, which can be more profitably exported. The public sactor's large fleet of cars now runs on LPG, and huilding gas fired power statations, and in converting factor-les and hospitals to gas. The singla largest undertaking has been the Rural Elec.

### NEW LAW AIMS TO BOOST EXPLORATION

ALGERIA'S new hydrocarbons law was the foreigner paying royalties of 20 per passed in August. It is intended to econr-age foreign companies to look for oil and gas, and is thought to pot Algeria rooghly on a par with laws eperating in China and

THE NEW SYSTEM: The following This option can apply evan when no oil is discovered.

from time to time there were complaints that expacted cona mixture of snrewa calculation and good fortune it has snc-ceeded in squeezing the max-imum out of its resources. Over the last couple of years, howevar, its advantage has been slipping away. Not only has ittrarts had not haan awarded. Now tha European Governmants have stepped hack, Invit-ing their gas companies to negotiate the Algarian contracts on a purely commarcial footing. In the past, the understanding

According to calculations by the Financial Times International Gas Raport, the effect of the deal will make Algerian gas harely more expensive than Soviet or Dotch supplies. The price in Rome of Algerian gas at the beginning of October is estimated to have been about \$2.60mbtu, compared to a Dutch and Soviet horder price of about \$2.25mhtu.

ing rival supplies.

оп

tion to be able to risk such stonewalling tricks. Hit not only by the lower volumes being tsken by European huyers, hut by the cancellation last year of a huge US contract—which was This marks a significant change in position over the last going to involve the shipping of 3.3 trillion cubic feet of gas over appeared in the deal reached in result of linking the gas price to' September with Italy, Algeria's oil, which was then rising shar-20 years-It now finds Itself with ply, and by cajoling Europenn Governments into Europenn a serious overcapacity in its gas Governments into paying a political premium for Algerian liquefication plants. This is strong motivation to find huyers for tha LNG now,

supplies, pricas were some-times allowed to creep some \$2mbtu above the cost of obtaineven those who are not pre-pared to sign long term con-tracts. This year, Sonatrach The political premlum plays no part in the Italian new deal made its first spot sales of gas to Germany, and is likely to start

selling soon on a spot basis to the US. Meanwhile, the search for other long-term customers continues. Agreement has been reached with Yngoslavia, and deliveries will begin in 1988. While the money was received on the understanding that Negotiations are undar way with Greece, Turkey, the US,

IN SELLING its oil and gas The compromise reached with abroad, Algeria has typically .Italy has bean to index the gas pondingly its purchases of also gently prohing tha priva-drivan a hard bargain. Through price to oil on a "pethack" basis. goods from those countrias, tisad British Gas, hoping that it a mixture of shrewd calculation This allows Algeria to retain its from time to time there were will become an important loog will become an important loog term customar hy the mid 1990s. France may also become a much larger huyer of Algerian gas naxt derade if it pulls out of its agreamant with the Norwegians to huy gas from the Troll and Sllepnar fields to meet a quartar of its needs into tha

quartar of its needs into that next century. Whether or not France signs up with Norway, Troll, with its massive gas reserves, will ha a mixed blessing for Algeria. Although it will have a signifi-cant effect on world gas supthat Algeria would match its gas sales with imports of goods has hitherto proved an important weapon in securing for itself a good deal. For example, in 1983, in order to force Spain into In order to force Spain into agreement on gas prices and quantities, Algarla stopped huying Spanish goods. After two years of such press-ure, Spain finally agread to pay \$500m In compensation in returo for taking lowar than previously agreed gas volumes. Algeria is no longer in a posi-tion to be able to risk such Although it will have a signifi-cant effect on world gas sup-plies, the costs of the gas-around £4mbtu-are about twire the costs of Algerian sup-plies, and Algeria is boping that one effect of Troll will be to increase the world gas price.

Unlike other Opac members crude oil plays a fairly small part in its total oil exports, with the bulk now coming from refined products and condensatas, which are not restricted hy official Opec production reilings. The merits of such diversity were plainly apparent last year, when the value of Algerian oil exports was unchaogad, whereas that of many other Opec countries was down hy more than a third.

Bacause of its relatively small, finite oil reserves Algeris ls ooe of Opec's hawks, always anxious lo sacure as high a price as possible. The country hopes that evants are now moving its way, and has been telling its people that the changa in the

Saudi oil ministers means a change for the better-a new bard-line oil policy, and higher prices ahead.

### FERROVIAL

(National Company for the Construction of Railway Equipment and Components)

### THE LEADING ROLLING STOCK CONSTRUCTOR IN ALGERIA

#### **MANUFACTURES:**

All kinds of wagons for goods' carrying, manufactured according to UIC and RIV international standards.

#### MAIN TYPES OF WAGON:

Flat 

 Open-Freight
 Covered
 Tank
 Hopper

#### HAS ALREADY EXPORTED:

To Africa and the Middle East

#### **ITS METHODS:**

FERROVIAL uses all necessary modern equipment and methods:

- Modern foundry •
- Mechanical workshops
- Several assembly lines
- Sets and Sub-sets manufacturing workshops
- Bogey-manufacturing assembly lines
- A testing laboratory
- A quality control department

#### **ITS OBJECTIVES:**

Within the national plan for social and economic development. FERROVIAL is concerned with: studies, research, development, production, marketing, import and export of railway equipment as well as components, namely:

- 1 Railway goods' wagons for freight and animals, covered, refrigerated and tank cars.
- 2 Railway coaches for passenger transport.
- 3 Railway traction engines/gear such as locomotives, loco tractors and loco-cranes.
- 4 Packing cases and containers for the storage and protection of goods in transit.
- 5 Mechanical equipment meant either for the vehicles and machines mentioned above or for shunting installations.

ficed its agriculture. Algerian loaders were husy trying to huild a hrave new world out of the ruins of what had heen left

the rains of what had need telt hehind by the colonisers. They were suspicious of foreigners and as tho regime lurched closer to a police state io tho mid-1970s, the very idea of trying to attract tourists was thought a frivolous proposition. Oil and gas were there in ahund-ance and they alooo, with industry, would suffice to feed aod educate tho new generation of

beauty.

This state of affairs is changing-not that the condition of most hotols lot alone the service or food ono gets is anything hut mediocre. But the Government, faced with the sharp fall in its sole source of foreign incomo, has come to realise that a larger flow of tourists could help the halance of paymoots, let alone

To the west of Oran the high hills towards Ain Temoucheot provide a perfect setting for shooting partridge and wild offer jobs which the ever higher price of oil for many years onahlod the state bureaucracy to create in return for very littlo boar.

Some hotels have been sold to Yet ruins, as Albert Camns wrote private ioterests, with mixed of those of the Roman port of Tipasa, can look younger than results: negotiations have been underway, first with the Indian many a modern city. Monumontal Berber tombs such chain of Oberoi, thon with Holi-day Inn to run the El Aurassi as the Tombeau de la Chretionne bear witness to a civilisation of which little is left. hotel jointly with the Algerians. Tho staff rebelled, in 1985, at the idoa that their numbers would have to be cut if an international

stantine, for 17 ceoturies the The Govornmont is, however, determined to press ahead-no easy task. Today's climate of public acknowledgement of the

shortcomiogs of this sector stands out in sharp contrast to the late 1970s when the same hotel's staff voted themselves the

not even the most unsophisti-cated waiter in the El Aurassi the forum—"To hunt, to bath, to ever believed. "The creation of a vice-ministry of towirm in 1064 and the set."

Algiers.

The creation of a vice-ministry of tourism in 1984 and tho ster-ling work being dono to promote tourism will only succeed if the private sector is given a much freer hand to invest and buy existing establishments. The new private restaurants which have sprung up in and aroond tho capital city since 1980 bear witness to capacity of many Algerians to offer good sermany Algerians to Capacity of many Algerians to offer good ser-vice and food. As for the attrac-tions of Algeria, they are truly endless—Allah has been bountiful when it comes to natural

beauty. Along the country's eastern shore, mountains, often thickly clad with cork-oak plunge into the sea-many hays are only accessible by boat while, oearer Algiers, the densely populated mouotain girt of the Kabylia region boasts a thousand villages perched on steen bill toos perched oo steep hill tops. Farther south, the Aures mountains, where the first shots wore fired in 1954 by a then small group of rehels, display a harsh-ness in winter which is only slightly softened on the southern

slopes by the proximity of the large casis of Biskra, much beloved of an earlier generation of European travellers. The local people, Chaoui Ber-bers, are reputed to be tough: our driver pointed to the 05 at tho end of tho Batna number

blates and jokingly said the "O is for intelligence, 5 for stubbornness." "Of course," he added, "that is how we got rid of the Freoch.

Algeria is full of ruins-Berber, Roman, Arab, Freoch, all hoar witness to a violent history.

The fortress-like city of Con-

ceotre of a prosperous Jewish community, perched high above tho Rhummol gorge must have been as daunting to besiege for the Romans as It proved for the French forces in 1834 and 1837. Romao ruins abound: Timgad

Agustus's Third Legion and where a 4000-seat theatre and monumental gate suggests that

inhahitants; Djamila perched high in the hills on a road that seems to lead nowhere. Muslim remains such as the

Kalaa des Beni Hamad--a vast amphitheatre high io the hills near Setif where only the tower of a mosque has been reconsti-tuted from the remains of a forthe from the remains of a for-mer capital that flourished in the middlo ages—are less well preserved, in part because the history has been cruel, and not only after the French arrived in 1830. However, the half century it took to congrue. Alcoring took to conquer Algeria estroyed many towns including Constactine and large areas of

Algiers. Tho French built a lot but much of the architecture is mediocre: however parts of Algiers retain a distinctive Ita-lian feel to them and Albert Camus stressed how Spanish, in contrast, was "l'eclat cruel d'Oran," a town which still boasts a hull ring and is domin-ated by a Moorish domed Catho-lic church called Notre Dame de Santa Cruz hardly a surprising Santa Cruz, hardly a surprising combination if oce remembers the town lived under Madrid from the 16th-18th centuries and Spanish emigrants outnumbered the French in tho area throughout the French colonial period.

But it is the greatest desert in the world which remains this country's best asset: the beauty and variety of the desert are difficult to conjure up for those who have oot visited it, so is the reserved yet welcoming and frank manners of the natives who often feel their brothors in the North belong to a different

It is hest to start with the town of Ghardaia. In reality there are five small ochre and white towns built on small hills which lio in a vast depression in the desert. They are surrounded by cases. The puritan Mozabite sect, which founded the towns nine conturies ago after fleeing persecution in the north, built houses and mosques of tho utmost simplicity which, earlier this century, inspire architect Le Corhusier. inspired the

The buildings are reminiscent of those found in Mall and Niger. Sadly two mosques have recently beeo built in mock Andalucian style which does not accord with the traditional surroundings. Such vandalism is not limited to Ghardaia and is causing uotold damage to othor Algerian towns.

Algiers. It was built in the 18th century.

Further west, the oasis settle-ment of Taghit springs into sight at a hend of the road sitting on a small ridge above an oued (river) whoso banks are planted with date palms and dominated by a very high sand tune. Too much like a picture postcard maybe, but none the less attractive.

Timimoun is an altogether grander affair, built on a high idge above a vast sehkha (dried lake). Today, driving across the salt-encrusted sand at sunset reminds you of the snow-covered Russian taiga in winter.

The oasis is most attractive and rolls down the slope which lies between the town and the sehhka: thousands of water conduits, still subject to age-old property laws, feed the minia-ture fields where wheat, pota-toes and vegetables grow.

A strange petrified forest unfolds below the plane as one-prepares to 'land in Djanet. Thousands of dark silhonettes march across the horizon, reminiscent of fir trees weighed down by snow. On closer inspec-tion they are sandstooe needles, ooo of the many mysterious sights of the Tassili N'Ajjer. Tas-

sili means a "plateau with riv-ers" in tifinar Berber, tho language spoken by the Touareg. The 50,000 square miles of tho Ajjer offers the visitor the largest neolithic art gallery in the world.

Djanet, one of the crossroads of the Sahara in prehistoric time, lies 1.250 miles south of the Mediterranean coast, close to Algeria's border with Libya. It is tho largest of the handful of oases which string the 500 mile long plateau.

The sheer mineral beauty of the Ajjer is breathtaking. Sefar, half a day's walk from Tamrit, is a city of tall rock walls bisected by streets which are the beds of streams that ran into a nearby lake.

Exploring Algoria is not a com-fortable pastime—but the lack of comfort of most hotels, the erratic ways if oot downright rude-ness of many Air Algelre personnel are not ao insurmoontable harrier. For those who are intrepid, the trip is well worth tho effort.
